

Top Ten Report - August 2024

Results from the July 2-24 FAST Swimming Masters LCM Meet and the Aug 3, 2024 ROSE Masters LCM Meet have been published/ There were no records reported at either of these meets.

The 2024 SCY times have now been finalized in the National database. Please remember that the season ended later than usual this year as SCY Nationals was held in June. I will be starting revision of the SPMS top times and records at the end of the month.

Please remember that if you have a swimmer with dual registration that you can only set USMS records at a USA Swimming meet unless you get a dual sanction or an observed status from USMS on the same meet. You cannot set an AQUA (formerly FINA) World record at a USA Swimming meet which is only sanctioned by USA Swimming. If the pool has not been included (measured or re-measured) in the USMS database, the times from a USA Swimming meet will go in the database but cannot be considered for rankings or T10.

Hosts, please remember that if you do not have a CTS printer hooked up, you will not get records submitted for a USMS/World Record. They do not accept printouts from inside Hy-tek as any decent admin or computer tech can change these times. Hook up your CTS printer!

Please everyone remember to submit split requests if there is the slightest possibility of setting a record or for Top 10. They must be done before the meet ends and cannot be submitted later.

As a reminder, all sanctioned USA Swimming meets are USMS Recognized and although FINA records cannot be set at these meets, times are good for Top 10 and USMS records. If you have a dual registered athlete setting T10 or USMS records at a USA Swimming meet, they must request the meet/times be added AND provide all the paperwork required INCLUDING pool measurements.
